

Company Overview

Founded in 1982 on the Seattle waterfront, Williamson & Associates (now Wassoc) has a 40-year legacy of innovation in subsea engineering, marine geophysics, and ocean technology. Under the leadership of principals Rob Millsap and Max Schlereth, Wassoc has evolved from its subsea acoustics and geophysical roots into a full-spectrum subsea engineering and technology firm. At Wassoc, we design, build, and operate precision-engineered systems for the world's most demanding marine environments.

Our team of engineers, technicians, and fabricators develop advanced subsea systems that perform reliably from the surface to full-ocean depth. From custom seafloor core drilling systems to subsea imaging, robotics, and environmental instrumentation, Wassoc delivers turnkey hardware and operational support to federal, commercial, and academic clients worldwide.

Core Competencies

- ✓ **Subsea Systems Engineering** – Full-ocean-depth mechanical, electrical, and hydraulic system design
- ✓ **Seafloor Drilling & Sampling** – ROV and lander-based core drills (BMS-series, ROCS)
- ✓ **Hydraulic Power & Controls** – Subsea HPUs, oil-compensated manifolds, and marinized actuators
- ✓ **Imaging & Instrumentation** – Subsea camera systems, environmental sensors, and data loggers
- ✓ **Prototyping & Field Support** – Complete in-house build, testing, and offshore / field support

Differentiators

- ✓ 40+ years of subsea engineering legacy
- ✓ Full lifecycle capability: concept → design → manufacture → deployment
- ✓ Proven systems operating at depths > 6,000 m
- ✓ Lean, agile engineering team with rapid development cycles
- ✓ Trusted collaborator with federal, commercial, and academic clients worldwide

Corporate Data

Williamson & Associates Technologies Inc. (Wassoc)

CAGE Code: 8FPQ8 UEI (DUNS): 117114410

Business Type: Small Business (S-Corp)

NAICS Codes: 541330, 541715

Location: Seattle / Spokane Washington, USA

Primary Contacts:

Rob Millsap – Principal
